

Sinclair Broadcasting is a danger to democracy in this country. By forcing their stations to air an anti-John Kerry program so close to an election it threatens the very fabric of our democracy. The public airwaves should not be used to promote a political agenda for either side under the guise of news. If the FCC is interested in policing the public airwaves for indecency it should use the same diligence to ensure that the public interest is being served with fair and equal programs to promote both viewpoints in this election. Thank you.
